Introduction

The Annual Report of the Maine Public Drinking Water Commission (MPDWC) is prepared for the Commissioner of the Department of Health and Human Services, pursuant to 22 M.R.S. § 2660-C (4). The purpose of the report is to provide the Commissioner with an understanding of the issues the MPDWC and the Maine CDC 's Drinking Water Program (DWP) faced during the last year, as well as outline the goals and work for the upcoming year. Background information about the regulated public water systems is also provided, along with the current fee structure. Enclosed with this report is the DWP's Public Drinking Water in Maine Annual Report 2019 and the 2019 Drinking Water Construction Project Report. Copies of these annual reports are also submitted to the members of the Health and Human Services Committee of the Maine Legislature.

Enabling Legislation

Legislation relating to the MPDWC is found in 22 M.R.S. §§ 2660-B - 2660-G. The statutes were first established in 1993 (c. 410) and have been modified five times since (1995, c. 581; 1995, c. 21; 1997, c. 705; 2001, c. 232; 2003, c. 601; and 2009, c. 15).

The legislation includes definitions, membership requirements, responsibilities, duties, compensation, annual report requirements, and authority to impose an annual public water system (PWS) operation fee.

Members of the Maine Public Drinking Water Commission

Name, Address, E-Mail	Seat # & Expiration Date	Statutory Provisions for Seat
Michael Abbott Director, Drinking Water Program11 State House, Station Augusta, ME 04333-0011 (207) 287-5684 FAX (207) 287-4172 E-mail: michael.abbott@maine.gov	<u>Seat 1</u> Until Replaced	Commissioner of Health and Human Services or the Commissioner's designee
Rebecca Laliberte The Meadows PO Box 629 Greene, ME 04236 (207) 946-3007 E-mail: <u>RLalib3967@aol.com</u>	<u>Seat 2</u> August 31, 2019	Represent the water purveying community and be associated with a public water system serving a population of not more than 1,000.
Thomas J. Brennan, C.G. Nestle Waters North America – Poland Springs 123 Preservation Way Poland Spring, Maine 04274 (207) 998-6350 ext. 6350 FAX (207) 998-5181 E-mail: <u>thomas.brennan@waters.nestle.com</u>	<u>Seat 3</u> August 31, 2021	Must represent the drinking water public
Robert N. MacKinnon, Jr. Yarmouth Water District, Superintendent PO Box 419, 14 Smith Street Yarmouth, ME 04096 (207) 846-5821 FAX (207) 846-1240 E-mail: <u>ywdbob@maine.rr.com</u>	<u>Seat 4</u> August 31, 2019	Represent the water purveying community and be associated with a public water system serving a population of at least 1001, but not more than 10,000.
Kathy Moriarty, Chairperson Bangor Water District, General Manager PO Box 1129 Bangor, ME 04402-1129 (207) 947-4516, FAX (207) 947-5707 E-mail: <u>moriarty@bangorwater.org</u>	<u>Seat 5</u> August 31, 2021	Represent the water purveying community and be associated with a public water system serving a population greater than 10,000.
Lee. Worcester, III Smugglers Den Campground PO Box 787 Southwest Harbor, ME 04679-0787 (207) 460-9033 E-mail: <u>bcw@smugglersdencampground.com</u>	<u>Seat 6</u> August 31, 2021	Must be a user of a transient, non- community water system
Carol White C.A. White & Associates 1 Main Street Yarmouth, ME 04096 (207)846-5599 FAX (207) 846-9066 E-mail: cawhitemaine@gwi.net	<u>Seat 7</u> August 31, 2020	Must be a user of a non-transient, non-community water system
Jeffrey D. LaCasse, 35 East River Road Skowhegan, ME 04976 E-mail: jdlacasse@myfairpoint.net	<u>Seat 8</u> August 31, 2019	Must represent the drinking water public
Brian Richardson Winterport Water and Sewer District, Trustee P.O. Box 260, 337 So. Main St Winterport, ME 04496 (207)223-8880 E-mail: <u>bprassociates@aol.com</u>	<u>Seat 9</u> August 31, 2021	Must represent the drinking water public

Drinking Water Program Organizational Chart

DRINKING WATER PROGRAM, DIVISION OF ENVIRONMENTAL AND COMMUNITY HEALTH, MAINE CDC

Performance Review of the Drinking Water Program

The MPDWC gets regular updates from the DWP and assesses the performance of this State agency. The management and the staff of the program are performing extremely well, especially given the ongoing budget and staffing constraints. Regulations and reporting requirements for drinking water systems continue to evolve under the direction of the EPA and the DWP continues to handle the challenges of these increased responsibilities. In addition, the DWP has done an excellent job in continuing to work with the regulated community to creatively navigate through challenges in securing federal matching dollars for the State Revolving Fund. Continued process improvement efforts help to increase the effectiveness of field work and compliance decisions to ensure the safety of Maine's drinking water and reliability of our Maine water systems.

Two additional reports produced by the Drinking Water Program that highlight the work done by the Program in 2019: 1) The Public Drinking Water in Maine Annual Report 2019 Report and 2) 2019 Drinking Water Construction Project Report. These reports demonstrate the effectiveness of the Drinking Water Program in assisting Maine public water systems to maintain required water quality standards and address the problems associated with aging infrastructure within those water systems. The reports can be found online at the following locations:

- Public Drinking Water in Maine Annual Report 2019 <u>www.medwp.com/consumers.shtml</u>
- 2019 Drinking Water Construction Project Report <u>www.medwp.com/pws/srf.shtml</u>

MPDWC Objectives for the Coming Year

The MPDWC will continue to support and guide the DWP as needed and prudently oversee the alternative funding mechanism established to fund a portion of the program's budget. Staffing and funding will remain extremely important issues for the DWP. In response to those concerns, the Commission in the upcoming year will:

- Continue to support and work to obtain the appropriate funding for the State Match of the Drinking Water State Revolving Fund
- Be a resource and an advocate for the director and staff of the DWP
- Review DWP performance measures to evaluate the operations and effectiveness of the DWP

Acknowledgements

The Commission acknowledges the dedication and work ethic of all employees of the DWP. DWP staff continues to provide effective and valuable assistance to Maine's 1,900 public water systems as they seek to address ever-evolving water issues and new regulations. The MPDWC feels confident in the DWP as a critical presence in promoting the safety and reliability of Maine's drinking water.

Alternative Funding Mechanism Fee

In 1993, the Legislature created legislation enabling the DWP to assess a fee on all public water systems. This fee is deposited in the Public Drinking Water Fund for the purpose of supporting the DWP. The fee, also known as the Alternative Funding Mechanism (AFM) Fee, is calculated by using a formula with a base rate and a population multiplier.

In State Fiscal Year 2020 the AFM fee paid the costs of 5.0 full-time employees. Each year, the MPDWC reviews the formula, the base fee, the per capita fee and the DWP budget to determine if

any changes need to be made to the formula or fee rates. Revenues derived from the collection of these fees are used to ensure adequate staffing to meet the US Environmental Protection Agency's requirements. Specifically, AFM funding covers the costs of five DWP staff positions.

For all water systems except bottled water and vending machines, the fee is equal to the minimum fee plus the per capita rate, multiplied by the population capacity of the system, minus the exempt population. A summary of the rate structure for these types of water systems can be found in Table 1 below.

А

Table 1 – SFY 2020 Rate Structure for all Bottled Water and Water Ve	
Description	Rate
Per capita rate (above base population)	\$0.60
Base fee	\$65
Base population	100

separate formula and rate structure exists for bottled water facilities and water vending machines. A summary of the rates for these facilities can be found in Table 2 below.

Table 2 – SFY	2020 Rate Structure for Bottl Vending	ed Water Facilities & Water
System Type	Description	Rate
In-State Small	Small (up to 250,000 gallons per year)	\$105

AFM Monthly Summary Percentage of Total Billed vs. Collected Updated June 30, 2020

AFM Fee Rate Changes for SFY 2021

The MPDWC has maintained a long-standing expectation that the carry-over funds available at the end of each state fiscal year should equal approximately three months of expenditures. To that end, during the May 3, 2017 meeting of the MPDWC, the commission members unanimously approved increasing fees for SFY 2019 by approximately 10 percent. The SFY 2020 fee structure can be found in Tables 3 and 4 below.

The Commission felt that adequate funding of the reserve account is necessary and reasonable to protect program operations in the event of unexpected circumstances. The Commission's intent is to continue to review and adjust funding and budgets annually to ensure financial stability for the program."

The following table illustrates the approved fee increase plan for SFY 2018 through SFY 2022.

Approved Alternative: Increase Base Fee by \$5 base and Per Capita Fee by \$0.05 in each year until three-month carry-over is achieved and transfer \$75,000 in cash over two years (SFY 2017 and SFY 2018) from another account to the AFM account (9.8% increase for first step increase - slightly lower for subsequent stepped increases)

Staff Merit Award

Annually, the MPDWC recognizes an employee of the Drinking Water Program who has made a significant contribution in the past year to the goals and mission of the program. Nominations are solicited and received from the drinking water "community" in Maine, including the DWP staff, other Maine water industry associations, and public water systems. In 2020, the Commission decided to recognize the entire Drinking Water Program for their response to and dedication during the COVID crisis.

* Does not include direct assistance to public water systems or technical assistance providers
