

**STATE OF MAINE
ONE HUNDRED AND TWENTY-SECOND LEGISLATURE
FIRST REGULAR SESSION
JOURNAL OF THE SENATE**

In Senate Chamber
Thursday
January 13, 2005

Senate called to order by President Beth G. Edmonds of Cumberland County.

Prayer by Reverend Michael N. Ambler, Jr. of the Grace Episcopal Church of Bath.

REVEREND AMBLER: Good morning and thank you for the privilege of being with you this morning. Let us pray.

Dear Lord, we thank You for the great State of Maine which day by day is the first in our nation to greet the rising sun. We thank You for its cities and its shoreline, its forest and its factories, for its rivers and bays, and all its beauty. We thank You for the things that we know here, things like caring for each other, being kind, speaking civilly, and remembering that relationships outlast issues. Grant that we may be a light to the nation and a reminder of the value of neighborliness.

Bless all those who gather here today to do the public business. Give them integrity in their work. Help them to hear the voices of those who speak clearly and are well represented and the voices of those who are inarticulate and unrepresented. We thank You for the service of the Senators and the staff who assists them. Grant that they all may remember the ideals that lead them to serve in the first place. May they honor the sacredness of the trust that rests in them and may they end this day proud of the work that they have done and the people they have been. Amen.

Doctor of the day, Dr. Rebecca Chagrasulis of Casco.

Reading of the Journal of Tuesday, January 11, 2005.

Joint Resolution

The following Joint Resolution:

H.P. 107

JOINT RESOLUTION ON BEHALF OF MAINE WOMEN WITH CERVICAL CANCER

WHEREAS, following breast cancer, cervical cancer is the 2nd most common cancer in women worldwide; and

WHEREAS, according to federal governmental statistics, cervical cancer is the 3rd most common gynecological cancer among American women, with approximately 12,200 new cases diagnosed annually, 4,100 of which result in fatalities; and

WHEREAS, with regular and accurate screening, cervical cancer is highly preventable; widespread screening programs have helped to reduce death rates of women from cervical cancer, but women are still dying even with such advanced medical techniques and evaluative procedures; and

WHEREAS, cervical cancer cases in the United States are generally attributed to a lack of awareness, a reduction of access to regular cervical cancer screening and a lack of screening accuracy; and

WHEREAS, experience shows that increasing awareness of cervical cancer among women, especially the underserved women within our State, significantly reduces the probability of mortality; and

WHEREAS, cervical cancer disproportionately affects minority women and women with lower incomes because they are less likely to have access to routine screening; and

WHEREAS, approximately 50% of all cervical cancer cases are in women who have never been screened, and 10% of cases are in women who have not been screened within the last 5 years; and

WHEREAS, the median age of cervical cancer patients at diagnosis is 47 years, the youngest median age for all female reproductive cancers; and

WHEREAS, new screening technologies, including FDA-approved testing for human papillomavirus, which is the cause of virtually all cervical cancers, offer new opportunities to finally eliminate this potentially deadly disease through early identification of women at increased risk; and

WHEREAS, leading medical organizations, including the American College of Obstetricians and Gynecologists, the American Cancer Society and the Association of Reproductive Health Professionals, have recently updated their screening guidelines to include FDA-approved testing for the human papillomavirus; and

WHEREAS, women are entitled to proper cervical cancer information to empower them to make informed health care decisions and obtain access to routine screening, including the most accurate methods available; and

WHEREAS, through education and screening, women can lower their likelihood for developing cervical cancer, and through early detection, cervical cancer can be successfully treated after it develops; now, therefore, be it

RESOLVED: That We, the Members of the One Hundred and Twenty-second Legislature now assembled in the First Regular Session, urge the Department of Health and Human Services to review available data regarding cervical cancer and human papillomavirus in women within all states and United States territories and to evaluate current methods used to provide women with information regarding cervical cancer, access to regular screening and options for increasing screening accuracy to more effectively inform women throughout the State that, with regular screening, cervical cancer is highly preventable; and be it further

RESOLVED: That suitable copies of this resolution, duly authenticated by the Secretary of State, be transmitted to the Honorable John E. Baldacci, Governor of Maine, to Dr. Dora Anne Mills, Director and State Health Officer, and to Mr. John R. Nicholas, Commissioner of Health and Human Services.

Comes from the House, **READ** and **ADOPTED**.
